

GENERATE INCOME AND PROTECT YOUR INVENTORY WITH SOLAR + BACKUP POWER

DON'T DO NOTHING

BONIFACE-HIERS MAZDA
Melbourne, FL

- 100% fixed electricity costs paid to the utility company

ROOFTOP SOLAR

HERZOG MEIER MAZDA
Beaverton, OR

- + Electricity is now a variable cost with 20% or less on average paid to the utility company
- + Tax credits, eligible grants, and bonus depreciation
- + Savings and income generation for decades akin to reinsurance in F&I

SOLAR CARPORTS

SAMES AUTO GROUP
Laredo, TX

- + Tax credits, eligible grants & 100% bonus depreciation
- + Savings and income generation for decades akin to reinsurance in F&I
- + Hail protection
- + Reduce open lot insurance costs
- + EV charging

Incentives are high and timing is ideal. Ask your A/P person to scan and send copies of your last 12 months of utility bills to receive your detailed solar analysis, and you'll have all you need for a go/no-go decision for your on-site power generation.

Storm-proof your operations with on-site battery/storage or back-up generators

- Protect critical loads during outages
- Reduce peak demand costs
- Purchase power at optimal time
- A backup source that refuels itself, solar+battery is like having a generator that can refuel itself.

The future is electrified, and you can take control of your power costs, using solar generates cash flow and revenue!
