Efficiency is Everything

Expert service equipment and systems planning will optimize the flow of people, equipment and vehicles—at no extra cost to you!

Four Proven Steps:

1 Equipment & Systems Needs Consultation Assessment

Key project document detailing contact information, target launch/phase dates, building requirements and recommended shop equipment to enhance fixed operations.

2 Detailed CAD Drawing

Includes detailed equipment and systems layout in service area as well as a lighting plan with photometric data.

3 Comprehensive Specifications & Budget

Includes detailed specifications for all major equipment called out in the Needs Assessment. Also includes a preliminary equipment and systems budget.

4 Project Coordination & Support

Single point of contact for service equipment and installation.

Most architects and contractors don't understand the needs of a service facility—we do!

Equipment and Systems Planning team members know service areas need to be set up to provide an optimal flow of people, equipment and vehicles into and out of the area. Because of our close partnership with the OEM, we know the BMW-approved equipment – where to place it for the best usage and work flow throughout the shop and how to get it installed.

Our experts will ensure your facility:

- ▶ Accommodates Future Vehicles
- ▶ Provides Layout Efficiency
- ▶ Maximizes Shop Throughput
- ▶ Meets OEM Design Criteria
