The BMW Equipment Program Advantage

We Offer:

- **OEM Approved Equipment Tailored to Meet Your Shop's Needs**
- **Experienced Personnel**
Industry-leading field sales organization. Our technical specialists will provide assistance on product selection, application, service and support for "One Stop Shopping" on all service department needs.
- **Customer Service Support**
 - World Class Service
 - Order/Delivery Status
 - Technical Support
- **Equipment and Systems Planning Services**
- **Flexible Payment Options**
 - DES Open Account
 - Financing & Leasing Programs
 - Major Credit Cards: Visa, MasterCard, American Express
 - Check, Money Order
- **A Minimum One Year Parts and Labor Manufacturer's Warranty**
- **Factory Direct Shipments**
- **Installation & Training Assistance**
- **A One Stop Shop—We work for you!**

The Complete Source for Your Service Center

Serious Lift Capability for Every Service Job

10,000 lb. Two-Post Asymmetric Lift With AV Arms

Rotary's AV Arms allow you to properly lift any vehicle on recommended OEM pickup points. Get more vehicles in the shop and on the lift faster with easy spotting and superior lifting capabilities.

- Easily spot lower profile vehicles with the 3 3/8" minimum adapter height.
- All vehicle arms with increased reach.
- Reach small, specific pick-up points on EVs with enough clearance to remove propulsion batteries.
- High-strength tapered arms for easier and faster positioning of adapters compared to traditional arm designs.
- Front Arm Reach 18 1/2" min., 41" max
- Rear Arm Reach 27 5/8" min., 58 1/4" max.
- Lift comes standard with round adapters, truck adapters and stacking extensions to lift, unibody, frame and EV.

39-SPOA10N20M0BK
\$7,830.00
 Regular Price \$8,455.00

Approved by BMW for use on EV vehicles.

Smart Lift with Trio Arms

10,000 lb. capacity, wide drive-through in-ground lift with rubber adapters.

- Proven environmentally-friendly design with over 47,000 units in operation and a 13-year track record.
- Completely enclosed in polymer composite housing, protecting the environment from the lift and the lift from the environment.
- Operates on only 19 quarts of fluid.
- Patented EasyAccess cylinder design reduces repair time by 75%.

39-SL210N10G0BK
\$12,215.00
 Regular Price \$13,474.00

In-Ground Smart Lift (39-SL210-RA, 39-SL210-TA, 39-SL210I-RA or 39-SL210I-TA) cannot be used for Battery Electric Vehicle high-voltage battery removal.

10,000 lb. Wide Inground Smart Lift With AV Arms

Comes with interchangeable adapter options — right out of the box. 10% greater arm sweep and 15% lower adapter height than any other inground in the market.

39-SLW210IN20M0BK
\$19,705.00
 Regular Price \$21,729.00

Approved by BMW for use on EV vehicles.

MORE UPTIME.
MORE FLEXIBILITY.
MORE VEHICLES SERVICED.

• Lift up to 20,000 lbs. • No cables = faster deployment • Use any flat space as a lift bay • Ideal for EV service operations • Compact, mobile, and efficient

On Car Lathe – BMW Package

The X15 is the latest innovation in on-vehicle rotor matching. The all-new computer system provides disc tracking, maintenance alerts, and variable speed control. The X15 is the first and only rotor matching system in the world to be driven by a 48v DC motor. Expect smooth operation, tighter run-out tolerances, and superior surface finishes. The 48v DC difference is incredible!

Features:

- Variable speed DC motor.
- Latest advanced electronics platform.
- Performance plus cutting head.
- Patented one-touch Lateral Run Out (LRO) compensation.
- Six-LED on-board work light.
- 2 -year parts and labor warranty.

Tire, Wheel and AC Service

B1200P Automated Wheel Balancer

The B1200P wheel balancer with diagnostic functions for car dealerships with high tire service volume. With touchscreen monitor and automatic non-contact data entry. Unbalance measurement and run-out diagnosis are performed in a single fast measuring run.

Features:

- Touchscreen with advanced user interface.
- easyWEIGHT – Pinpoint laser accurately.
- Automatic Inputs – Optical scanners automatically measure the wheel.
- Automatic balance measurement.
- Automatic behind the spoke weight placement.
- Patented automatic power clamp.
- LED wheel lighting.
- Stop-in-Position feature where the operator only has to touch the amount of unbalance on the screen and the wheel is automatically indexed to correction position.
- Collets.

119-EEWB567AUB

\$14,135.00

Regular Price \$17,213.00

T7800 All-In-One Tire Changer

The John Bean T7800 is a leverless tire changer featuring a unique collection of tools, including intuitive control panel, powerMONT™, lower bead camera viewer, on-floor bead breaker and quickLOK™ technology. It was engineered with superior functionalities that require less effort for technicians to operate and an advanced set of tools that only touch the tire, never the rim, minimizing the risk of damage when working with standard, UHP and run-flat tires.

119-EEWH586AUB

\$24,135.00

Regular Price \$29,489.00

R134A Hybrid A/C Machine

Ecotechnics fully automatic R134A hybrid A/C charging and recycling.

Features:

- Fully automatic operations with automatic service valves, meaning operator intervention is not required after the connection of hoses to the vehicle and the start of the procedure.
- Status light provides immediate information about the workflow status from a far distance allowing the technicians to monitor the operation while performing different activities.

119-EEAC820B

\$5,035.00

Regular Price \$5,961.00

Regular Price \$1,467.00

Brake Fluid and Air Conditioning Service

Mahle BFX-60 Brake Fluid Exchange Unit

FluidPRO® brake fluid flush systems deliver complete brake fluid exchange using simple processes.

Features:

- Constructed for larger volumes. The brake fluid is removed directly from its 16 gal original container.
- Fitted with the BFX PLUS extraction system.
- Fitted with an infinitely variable pressure suction tube with sieve.
- Suitable for ABS, ESP, EDS and SBC.
- Pulsating fluid flow to pressurize air bubbles out of the braking system.
- Automatic switch-off on empty container.
- Pressure-less decoupling from vehicle.
- Venting of device during container changeover not necessary.
- Adapter available for all established vehicle types.

3-Ton Capacity Service Jack

Low-profile, compact design for easy and convenient positioning underneath vehicles. The sleek design can be used on vehicles with minimal ground clearance, ground effects, and low fairings without needing makeshift methods before lifting. Built-in safety overload system prevents use beyond the rated capacity for safer operation. Meets all 5 ASME PASE-2019 safety standards for service jacks.

- Lifting range: 2.95" - 20"
- Saddle: 4" dia., steel crown
- Handle length: 46-1/4" with padded lower section
- Frame height: 6.3"
- Handle length: 46-1/4" with padded lower section
- Floor space: 13.5" x 28.5"
- Casters: 4; 2.4" front fixed (2), 2.4" rear swivel (2)
- Dual pump design provides quick lift with load.
- Limited Lifetime Warranty

Air Conditioning Service and Accessories

Tracer Gas Leak Detector Service Kit

The Robinair Tracer Gas service kit gives technicians the tools necessary to use tracer gas in place of refrigerant to find A/C system leaks. The LD9-TGKIT includes a hydrogen gas leak detector with sensor technology designed to detect a 5% hydrogen/95% nitrogen tracer gas mixture. The detector's full color liquid crystal display (LCD) and sweep mode function convey messages, graphics, and prompts to help technicians locate the source of a leak and ensure that the leak detector is always at optimal performance. A patented 3 LED inspection light aids in locating and inspecting suspected leak sources.

IR Thermometer PRO 10:1

The device has an optical lens that collects the radiated infrared energy from the object and focuses it on the detector. The detector converts the energy into an electrical signal that's amplified and displayed as a temperature reading. An infrared thermometer measures temperature by sensing the magnitude of radiated energy at infrared frequencies. Using this data and the actual temperature of the detector, the thermometer calculates the temperature of the surface that emitted the energy.

Lube Handling

Smart Oil Pump - T6

Storing, tracking and dispensing oil has always been a hassle. Whether it comes in quarts, jugs or large drums, oil always seems to make a mess, waste product and create confusion. Inventory rarely adds up, overfills lead to cleanup, and transferring oil between containers only increases the chance of spills and contamination. These everyday frustrations slow down workflow and cost shops valuable time and money.

The AGA Smart Oil Pump eliminates these challenges by combining precision, automation and mobility in one clean system. It allows you to pump directly from stored containers — no open jugs or messy transfers. A built-in self-flushing system prevents contamination when switching oil types, while real-time inventory tracking keeps you informed on usage and remaining quantities. With secure RO-entry dispensing, oil can only be accessed when a repair order is entered, keeping your stock under control. Powered by a Milwaukee M12 battery (not included), it's fully mobile and ready to work anywhere in your shop.

- T6 dispenses up to 6 different type of fluids, T2 dispenses fluid from a 16gal (60L) to 55gal (208L) drum.
- Dispense reporting and inventory control (included for 6 months).
- T6 includes refill funnel to keep refills clean and easy.
- Can work with engine oil, transmission fluid or differential fluid.
- Adjustable flushing amount to prevent cross contamination.
- Built-in secondary containment.
- 4 Smooth caster wheels make it easy to maneuver around your shop.

753-AGA-SOP-T6
Smart Oil Pump - T6

Regular Price \$3,172.00

Smart Oil Pump - T2

The AGA Smart Oil Pump T2 streamlines oil storage, tracking and dispensing with precision — eliminating overfills, underfills and inventory errors. Powered by a Milwaukee M12 battery, it's fully mobile and handles 200-liter drums effortlessly.

- Accurate Dispensing – Prevents overfills and waste with precise control.
- Mobile Design – Features an easy-to-push cart with locking casters for stability and convenience.
- Enhanced Cleanliness – Direct dispensing eliminates the need for messy fluid transfers.
- Real-Time Tracking – Continuously monitors levels and sends low-level alerts.
- Secure Access – Optional PIN code to prevent unauthorized use.
- Variable Flow Control – Offers high and low flow rates for different needs.

Efficiency is Everything

Expert service equipment and systems planning will optimize the flow of people, equipment and vehicles—at no extra cost to you!

Four Proven Steps:

1 Equipment & Systems Needs Consultation Assessment

Key project document detailing contact information, target launch/phase dates, building requirements and recommended shop equipment to enhance fixed operations.

2 Detailed CAD Drawing

Includes detailed equipment and systems layout in service area as well as a lighting plan with photometric data.

3 Comprehensive Specifications & Budget

Includes detailed specifications for all major equipment called out in the Needs Assessment. Also includes a preliminary equipment and systems budget.

4 Project Coordination & Support

Single point of contact for service equipment and installation.

Most architects and contractors don't understand the needs of a service facility—we do!

Equipment and Systems Planning team members know service areas need to be set up to provide an optimal flow of people, equipment and vehicles into and out of the area. Because of our close partnership with the OEM, we know the BMW-approved equipment – where to place it for the best usage and work flow throughout the shop and how to get it installed.

Our experts will ensure your facility:

- ▶ Accommodates Future Vehicles
- ▶ Provides Layout Efficiency
- ▶ Maximizes Shop Throughput
- ▶ Meets OEM Design Criteria

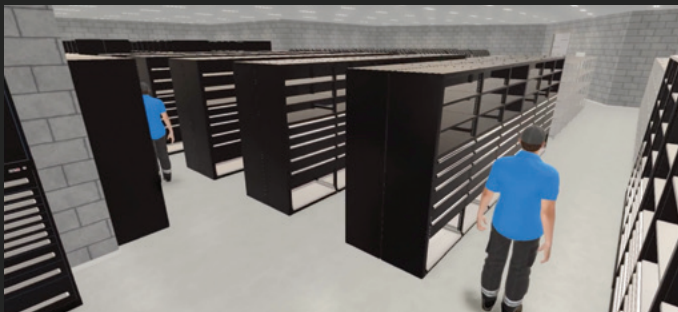

BMW Equipment Program

Call today to speak with an Equipment & Systems Planning Specialist! 1.888.222.7997

Visualize your Service Department in 3D!

- ▶ Explore your shop design in beautiful real-time 3D prior to construction. Take a walk in the repair shop and see exactly how it will look in real life (via online web conference).
- ▶ Verify equipment color(s) suit your needs prior to purchase.
- ▶ Validate all selected equipment will fit and function properly within the Service Area without interference with the building infrastructure/mechanical systems.
- ▶ Realistic images allow comparison of key product selections, in-ground versus above ground lifts/exhaust systems, tool boxes and workbenches.
