Serious Lift Capability for Every Bay and Every Service Job

10,000 Two-Post Asymmetric Lift With AV Arms

Rotary's AV Arms allow you to properly lift any vehicle on recommended OEM pickup points. Get more vehicles in the shop and on the lift faster with easy spotting and superior lifting capabilities.

With the shortest arm retraction and largest pickup range of any two-post lift, Rotary's AV lift arms simplify your shop and give technicians the flexibility and clearance needed to service any vehicle.

- Easily spot lower profile vehicles with the 3 3/8" minimum adapter height.
- All vehicle arms with increased reach.
- Reach small, specific pick-up points on EVs with enough clearance to remove propulsion batteries.
- High-strength tapered arms for easier and faster positioning of adapters compared to traditional arm designs.
- Front Arm Reach 18 1/2" min., 41" max
- Rear Arm Reach 27 5/8" min., 58 1/4 " max.
- Lift comes standard with round adapters, truck adapters and stacking extensions to lift, unibody, frame and EV.

10,000 lb wide in-ground SmartLift, rubber adapters, bench controls

Wide in-ground SmartLift with rubber adapters and compact bench mounted controls. 88" of drive-through clearance.

- 10,000 lb. lifting capacity.
- 88" of drive-thru clearance, ideal for EV battery removals.
- Trio arm configuration with rubber adapters, ideal for pinch-weld or unibody lifting.
- Environmentally responsible with second polymer containment for below-ground components.
- All internal components are serviceable from floor level for quick repairs.
- One-touch controls may be pedestal, bench or wall mounted.
- 71" cylinder stroke at full rise.
- 208/230v electric.
- Rise time is 53 seconds, descent time is 24 seconds.

10AP BiMetric 10,000-lb Capacity 2-Post Lift

BendPak's all-new AP series of two-post lifts feature a revolutionary design that factors the best qualities of today's two-post lift types into a completely new concept in car lift engineering. The result is a lift unlike any other two-post lift on the market, purposefully designed for extreme use, high loads and operator safety and efficiency.

Our 10AP Series offers the convenience of wide or narrow installation wrapped up into one configurable package. This durable, safe, and reliable car lift features an expandable top beam and BI-METRIC™ arms to suit virtually every vehicle lifting requirement – symmetric or asymmetric. The simple, yet highly sophisticated lift design keeps service and maintenance costs to a minimum, delivering lower operating expenses and higher productivity.

Automatic arm restraint system prevents unplanned movement

Swing arm restraints have been used for decades on two-post lifts to minimize the chance of arms shifting during vehicle loading and service. However, until now, these systems had a difficult time withstanding the excessive forces applied to them when vehicles suddenly and unexpectedly shifted on the support pads or adapters of the far-reaching swing arms; typically due to improper loading or when heavy drivetrain components are added or removed from elevated vehicles causing an unanticipated transference in the center of balance.

Features:

- Triple Telescoping Arms, Front and Rear.
- Standard Low-Profile Arms.
- Bi-Metric™ Arms Easily Accommodate Both Symmetric and Asymmetric Lifting.
- Patented ASARS Arm Restraints Secure Lift Arms with all-new 360-Degree Locks - Tested to Over 2000-Pounds of Lateral Force.
- ALI Certified.

B2000 Wheel Balancer 230V

A fully automatic diagnostic wheel balancing system that uses five high-resolution cameras to create a complete 3D mapping system of the rim and tire profile.

- RUNOUT MEASUREMENTS A 3D model of the tire and wheel allows for a complete diagnosis of the assembly uniformity and displays radial runout with peak-to-peak measurements from the first to the third harmonic.
- MATCH MOUNTING Optimize the assembly of the tire on the rim improving the assembly roundness to reduce the shape vibrations.
- LASER 3D SURFACE MAPPING Utilizes a high-resolution camera and laser-based technology to provide sidewall analysis, as well as depth, wear, and tire surface abnormalities that are displayed in an easy-to-read format.
- OPTILINE™ WHEEL SET OPTIMIZATION Based on a predetermined set of criteria, OptiLine suggests the optimal location for each wheel to address any pull or vibration-related issues.
- TOUCHSCREEN INTERFACE Fast and intuitive interface with large digits, colored weight position indicators increase speed, ease-of-use, and ergonomics for the daily job.
- EASYWEIGHT™ Take the guesswork out of weight placement; this pinpoint accurate system uses a laser to show the exact spot to place a weight to ensure precise balancing.

Leak Detection, Digital Thermometer and Air Conditioning Accessories

Tracer Gas Leak Detector Service Kit

The Robinair Tracer Gas service kit gives technicians the tools necessary to use tracer gas in place of refrigerant to find A/C system leaks. The LD9-TGKIT includes a hydrogen gas leak detector with sensor technology designed to detect a 5% hydrogen/95% nitrogen tracer gas mixture. The detector's full color liquid crystal display (LCD) and sweep mode function convey messages, graphics, and prompts to help technicians locate the source of a leak and ensure that the leak detector is always at optimal performance. A patented 3 LED inspection light aids in locating and inspecting suspected leak sources.

Optimize the Flow of People, Equipment and Vehicles

Expert service equipment & systems planning—at no cost to you!

Four Proven Steps:

1 Equipment & Systems Needs Consultation Assessment

Key project document detailing contact information, target launch/phase dates, building requirements and recommended shop equipment to enhance fixed operations.

2 Detailed CAD Drawing

Includes detailed equipment and systems layout in service area as well as a lighting plan with photometric data.

3 Comprehensive Specifications & Budget

Includes detailed specifications for all major equipment called out in the Needs Assessment. Also includes a preliminary equipment and systems budget.

4 Project Coordination & Support

Single point of contact for service equipment and installation.

Let us partner with your architects and contractors to meet all of your facility needs.

Equipment and Systems Planning team members know service areas need to be set up to provide an optimal flow of people, equipment and vehicles into and out of the area. Because of our close partnership with the OEM, we know the Hyundai-approved equipment – where to place it for the best usage and work flow throughout the shop and how to get it installed.

Our experts will ensure your facility:

- ▶ Accommodates Future Vehicles
- ▶ Provides Layout Efficiency
- ▶ Maximizes Shop Throughput
- ▶ Meets OEM Design Criteria

Call today to speak with an Equipment & Systems Planning Specialist! 1.866.539.4248

Visualize Your Service Department in 3D!

- ▶ Explore your shop design in beautiful real-time 3D prior to construction. Take a walk in the repair shop and see exactly how it will look in real life (via online web conference).
- ▶ Verify equipment color(s) suit your needs prior to purchase.
- ▶ Validate all selected equipment will fit and function properly within the Service Area without interference with the building infrastructure/mechanical systems.
- ▶ Realistic images allow comparison of key product selections, in-ground versus above ground lifts/exhaust systems, tool boxes and workbenches.
