## 10,000 Two-Post Asymmetric Lift With AV Arms

*Rotary's AV Arms allow you to properly lift any vehicle on recommended OEM pickup points. Get more vehicles in the shop and on the lift faster with easy spotting and superior lifting capabilities.*

- Easily spot lower profile vehicles with the 3 3/8" minimum adapter height.
- All vehicle arms with increased reach.
- Reach small, specific pick-up points on EVs with enough clearance to remove propulsion batteries.
- High-strength tapered arms for easier and faster positioning of adapters compared to traditional arm designs.
- Front Arm Reach 18 1/2" min., 41" max
- Rear Arm Reach 27 5/8" min., 58 1/4" max.
- Lift comes standard with round adapters, truck adapters and stacking extensions to lift, unibody, frame and EV.

39-SPOA10-AV

**\$7,397.00**

Dealer Price \$8,146.00

## Smart Lift with Trio Arms

*10,000 lb. capacity, wide drive-through in-ground lift with rubber adapters.*

- Proven environmentally-friendly design with over 47,000 units in operation and a 13-year track record.
- Completely enclosed in polymer composite housing, protecting the environment from the lift and the lift from the environment.
- Operates on only 19 quarts of fluid.
- Patented EasyAccess cylinder design reduces repair time by 75%.

## T7800 All-In-One Tire Changer

*The John Bean T7800 is a leverless tire changer featuring a unique collection of tools, including intuitive control panel, powerMONT™, lower bead camera viewer, on-floor bead breaker and quickLOK™ technology. It was engineered with superior functionalities that require less effort for technicians to operate and an advanced set of tools that only touch the tire, never the rim, minimizing the risk of damage when working with standard, UHP and run-flat tires.*

- **quickLOK™** – The fast and effortless automatic wheel clamping with center post design.
- **powerMONT™** – The innovative, fast and easy-to-use leverless mount and demount system.
- **Lower Bead Camera Viewer** – assists technicians during lower bead breaking operation.
- **Dynamic Bead Breaker** prevents wheel damage while enhancing precision and productivity with synchronized dual disks.
- **Top Side Bead Seater** – Ergonomic nozzle injects high-speed air blasts into the tire, raising the bead to seal the tire to the rim.
- **PROspeed™** continuously monitors torque and automatically reduces speed during critical procedures.

- **On-Floor Bead Breaker** with powered handle gives an alternative option for use on soft sidewall and high aspect ratio tires.
- **Pedal Operated Wheel Lift** for easy mounting and dismounting of heavy tire and wheel assemblies and improved ergonomics.

119-EEWH586AUB

**\$23,865.00**

Dealer Price \$29,489.00

## Mercedes Benz-Specific Aligner Console and Sensors

- The aligner is self-calibrating multiple times a second.
- The cameras automatically track with the vehicle as it is raised to produce the best accuracy and the most productivity a shop can have in a wheel aligner.
- Takes up less space in front of the vehicle.
- Passive targets require no power and are more durable than active components mounted to the wheels.
- MB Quick Clamps ("MB-Schnellspannhalter") are fully supported and no rolling compensation is required. Simply mount the clamps and begin the adjustment process.
- AC700 wheel clamps are also provided standard. These clamps support a short rollback procedure for compensation of the wheel clamp and wheel assembly.
- System provides accurate measurements for all specific Mercedes Benz, Smart and Mercedes-Maybach vehicles. Vehicle specification updates are available through Daimler AG.
- Software with enhanced features and more convenient operation.
- Compatible to asanetwork.
- Car-specific databases with setting aids of the past 25+ years.
- 3D measurement screen with all relevant data & CE conform.
- Finish RAL 7015.

119-EEWA553MB1

**\$31,135.00**

Dealer Price \$32,616.00

## B1200P Automated Wheel Balancer

*The B1200P wheel balancer with diagnostic functions for car dealerships with high tire service volume. With touchscreen monitor and automatic non-contact data entry. Unbalance measurement and run-out diagnosis are performed in a single fast measuring run.*

### Features:

- Touchscreen with Advanced User Interface.
- easyWEIGHT – Pinpoint laser accurately.
- Automatic Inputs – Optical scanners automatically measure the wheel.
- Automatic Balance Measurement.
- Automatic Behind the Spoke Weight Placement.
- Patented Automatic Power Clamp.
- LED Wheel Lighting.
- Stop-in-Position feature where the operator only has to touch the amount of unbalance on the screen and the wheel is automatically indexed to correction position.
- Collets.

## AC Flush Machine R134a and R1234yf

*The flushing unit is suitable for cleaning components and A/C systems operating with R1234yf and R134a refrigerant. Such function is normally used when cleaning of A/C system hoses is required.*

### Features:

- Works with most all AC Service Machines.
- Flushing Bottle with a stand-alone fixture for a flexible usage independent from the A/C Service Unit location and model.
- Refrigerant Filter with easy-to-change access.
- Flushing control sight glass with an ergonomic positioning to check the flushing process and level of refrigerant purity.
- HP Hose-Port Adapter-Set for flexible usage with different A/C Service stations.
- Flushing Adapter-Set (3/8" + 1/4") to connect with different flushing ports and adapters at the A/C system/component.
- Coupler Adapter-Set (for R134a and R1234yf) to connect the LP couler at the flushing kit.

## ACX2180 - High Performance R134a Air Conditioning Service System

### Features:

- State-of-the-art ergonomic design, 7" capacitive touch LCD display, and intuitive user interface sets a new industry standard.
- Contains three transducers, providing reduced process times over dual sensor units.
- LED light indicates status visible from anywhere in the workshop.
- iOS and Android capable phone app allowing remote service session mirroring and advanced functions.
- Best-in-class serviceability with a new ergonomic hinged service door simplifies unit service.
- Permanent wireless automatic software updates, ensuring you always have the latest features.
- Automatic weighing of recovered oil, allowing accurate replenishment of oil removed during service and allows two oil types for injection.
- Integrated UV dye injection provides high level of A/C system leak detection.
- Remote support for technicians allows MAHLE to connect to a unit over WiFi for troubleshooting and advanced support.
- Data management and reporting metrics offers the ability to log and monitor services allowing analytics for proactive service reminders, refrigerant use optimization, warranty reporting and more.
- Every unit is built to be easily repaired by the owner and we proudly offer nationwide service centers and lifetime phone support coverage.
- Retain valuable service records, network printing capability to print services provided for customer.

# Efficiency is Everything

Expert service equipment and systems planning will optimize the flow of people, equipment and vehicles—at no extra cost to you!

## Four Proven Steps:

### 1 Equipment & Systems Needs Consultation Assessment

Key project document detailing contact information, target launch/phase dates, building requirements and recommended shop equipment to enhance fixed operations.

### 2 Detailed CAD Drawing

Includes detailed equipment and systems layout in service area as well as a lighting plan with photometric data.

### 3 Comprehensive Specifications & Budget

Includes detailed specifications for all major equipment called out in the Needs Assessment. Also includes a preliminary equipment and systems budget.

### 4 Project Coordination & Support

Single point of contact for service equipment and installation.

**Most architects and contractors don't understand the needs of a service facility—we do!**

*Equipment and Systems Planning team members know service areas need to be set up to provide an optimal flow of people, equipment and vehicles into and out of the area. Because of our close partnership with the OEM, we know the MBUSA-approved equipment – where to place it for the best usage and work flow throughout the shop and how to get it installed.*

### Our experts will ensure your facility:

- Accommodates Future Vehicles
- Provides Layout Efficiency
- Maximizes Shop Throughput
- Meets OEM Design Criteria

Mercedes-Benz

**Call today to speak with an Equipment & Systems Planning Specialist! 1.888.458.4040**

## Visualize Your Service Department in 3D!

- Explore your shop design in beautiful real-time 3D prior to construction. Take a walk in the repair shop and see exactly how it will look in real life (via online web conference).
- Verify equipment color(s) suit your needs prior to purchase.
- Validate all selected equipment will fit and function properly within the Service Area without interference with the building infrastructure/mechanical systems.
- Realistic images allow comparison of key product selections, in-ground versus above ground lifts/exhaust systems, tool boxes and workbenches.
