T7800 All-In-One Tire Changer

The John Bean T7800 is a leverless tire changer featuring a unique collection of tools, including intuitive control panel, powerMONT™, lower bead camera viewer, on-floor bead breaker and quickLOK™ technology. It was engineered with superior functionalities that require less effort for technicians to operate and an advanced set of tools that only touch the tire, never the rim, minimizing the risk of damage when working with standard, UHP and run-flat tires.

- **quickLOK™** – The fast and effortless automatic wheel clamping with center post design.
- **powerMONT™** – The innovative, fast and easy-to-use leverless mount and demount system.
- **Lower Bead Camera Viewer** – assists technicians during lower bead breaking operation.
- **Dynamic Bead Breaker** prevents wheel damage while enhancing precision and productivity with synchronized dual disks.
- **Top Side Bead Seater** – Ergonomic nozzle injects high-speed air blasts into the tire, raising the bead to seal the tire to the rim.
- **PROspeed™** continuously monitors torque and automatically reduces speed during critical procedures.

- **On-Floor Bead Breaker** with powered handle gives an alternative option for use on soft sidewall and high aspect ratio tires.
- **Pedal Operated Wheel Lift** for easy mounting and dismounting of heavy tire and wheel assemblies and improved ergonomics.

Mercedes Benz-Specific Aligner Console and Sensors

- The aligner is self-calibrating multiple times a second.
- The cameras automatically track with the vehicle as it is raised to produce the best accuracy and the most productivity a shop can have in a wheel aligner.
- Takes up less space in front of the vehicle.
- Passive targets require no power and are more durable than active components mounted to the wheels.
- MB Quick Clamps ("MB-Schnellspannhalter") are fully supported and no rolling compensation is required. Simply mount the clamps and begin the adjustment process.
- AC700 wheel clamps are also provided standard. These clamps support a short rollback procedure for compensation of the wheel clamp and wheel assembly.
- System provides accurate measurements for all specific Mercedes Benz, Smart and Mercedes-Maybach vehicles. Vehicle specification updates are available through Daimler AG.
- Software with enhanced features and more convenient operation.
- Compatible to asanetwork.
- Car-specific databases with setting aids of the past 25+ years.
- 3D measurement screen with all relevant data & CE conform.
- Finish RAL 7015.

Efficiency is Everything

Expert service equipment and systems planning will optimize the flow of people, equipment and vehicles—at no extra cost to you!

Four Proven Steps:

1 Equipment & Systems Needs Consultation Assessment

Key project document detailing contact information, target launch/phase dates, building requirements and recommended shop equipment to enhance fixed operations.

2 Detailed CAD Drawing

Includes detailed equipment and systems layout in service area as well as a lighting plan with photometric data.

3 Comprehensive Specifications & Budget

Includes detailed specifications for all major equipment called out in the Needs Assessment. Also includes a preliminary equipment and systems budget.

4 Project Coordination & Support

Single point of contact for service equipment and installation.

Most architects and contractors don't understand the needs of a service facility—we do!

Equipment and Systems Planning team members know service areas need to be set up to provide an optimal flow of people, equipment and vehicles into and out of the area. Because of our close partnership with the OEM, we know the MBUSA-approved equipment – where to place it for the best usage and work flow throughout the shop and how to get it installed.

Our experts will ensure your facility:

- Accommodates Future Vehicles
- Provides Layout Efficiency
- Maximizes Shop Throughput
- Meets OEM Design Criteria

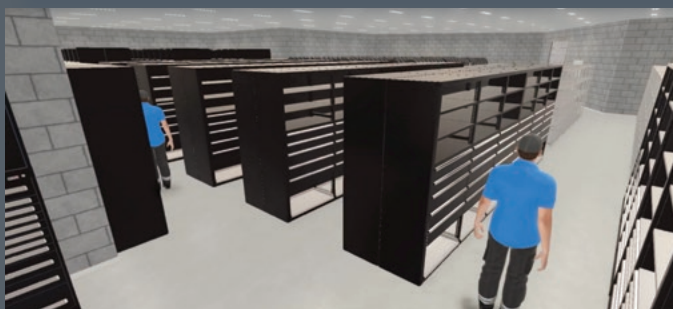

Mercedes-Benz

Call today to speak with an Equipment & Systems Planning Specialist! 1.888.458.4040

Visualize Your Service Department in 3D!

- Explore your shop design in beautiful real-time 3D prior to construction. Take a walk in the repair shop and see exactly how it will look in real life (via online web conference).
- Verify equipment color(s) suit your needs prior to purchase.
- Validate all selected equipment will fit and function properly within the Service Area without interference with the building infrastructure/mechanical systems.
- Realistic images allow comparison of key product selections, in-ground versus above ground lifts/exhaust systems, tool boxes and workbenches.
