T7800 All-In-One Tire Changer

The John Bean T7800 is a leverless tire changer featuring a unique collection of tools, including intuitive control panel, powerMONT™, lower bead camera viewer, on-floor bead breaker and quickLOK™ technology. It was engineered with superior functionalities that require less effort for technicians to operate and an advanced set of tools that only touch the tire, never the rim, minimizing the risk of damage when working with standard, UHP and run-flat tires.

- Lower Bead Camera Viewer - assists technicians during lower bead breaking operation.
- Dynamic bead breaker prevents wheel damage while enhancing precision and productivity with synchronized dual disks.
- PROspeed™ continuously monitors torque and automatically reduces speed during critical procedures.
- Top Side Bead Seater - Ergonomic nozzle injects high-speed air blasts into the tire, raising the bead to seal the tire to the rim.
- On-Floor Bead Breaker with powered handle gives an alternative option for use on soft sidewall and high aspect ratio tires.
- Wheel lift for easy mounting and dismounting of heavy tire and wheel assemblies and improved ergonomics.

Serious Lift Capability for Every Service Job

TOOL & EQUIPMENT PROGRAM

10,000 lb. Two-Post Asymmetric Lift With AV Arms

Rotary's AV Arms allow you to properly lift any vehicle on recommended OEM pickup points. Get more vehicles in the shop and on the lift faster with easy spotting and superior lifting capabilities.

- Easily spot lower profile vehicles with the 3 3/8" minimum adapter height.
- All vehicle arms with increased reach.
- Reach small, specific pick-up points on EVs with enough clearance to remove propulsion batteries.
- High-strength tapered arms for easier and faster positioning of adapters compared to traditional arm designs.
- Front Arm Reach 18 1/2" min., 41" max
- Rear Arm Reach 27 5/8" min., 58 1/4" max.
- Lift comes standard with round adapters, truck adapters and stacking extensions to lift, unibody, frame and EV.

39-SPOA10N20M0BK

\$7,830.00

Dealer Price \$8,455.00

Smart Lift with Trio Arms

10,000 lb. capacity, wide drive-through in-ground lift with rubber adapters.

- Proven environmentally-friendly design with over 47,000 units in operation and a 13-year track record.
- Completely enclosed in polymer composite housing, protecting the environment from the lift and the lift from the environment.
- Operates on only 19 quarts of fluid.
- Patented EasyAccess cylinder design reduces repair time by 75%.

39-SL210N10G0BK

\$12,215.00

Dealer Price \$13,474.00

In-Ground Smart Lift (39-SL210-RA, 39-SL210-TA, 39-SL210I-RA or 39-SL210I-TA) cannot be used for Battery Electric Vehicle high-voltage battery removal.

12,000 lb. Wide Inground With AV Arms

12,000 lb. wide in-ground SmartLift with truck adapters and compact bench mounted controls. 88" of drive-through clearance.

On Car Brake Lathe and Storage Solutions

TOOL & EQUIPMENT PROGRAM

X9 Brake Lathe With Accessories and 3 Mazda Adapters

Combines Pro-Cut's best existing technologies, like patented PFM one button computerized compensation system, 4 wheel, 4 axis fully adjustable trolley, a rigid new X-Frame lathe chassis, powerful belt driven high-torque drivetrain, and super bright 6 LED light to give you a clear path to higher profits! All X9's come with our famous DRO display that includes live run-out, productivity tracking and lathe diagnostics. X9's are digitally expandable to optional G2X and GYR systems.

Features:

- Patented one touch Lateral Run Out (LRO) compensation: Press one button and the lathe compensates in less than 20 seconds!
- DRO "Live" digital computer display: Displays actual live LRO of machine & tracks # of compensations and duration.
- Custom Calibrated Rate Sensor: Locks lathe in at .001" or less LRO every time you compensate for factory perfect cuts.
- 4 Wheel, 4 Axis, Adjustable Trolley: Working Range of 21" to 43" allows the use on any lift or no lift!
- 6 LED on-board work light: Improves technician safety and efficiency in dark wheel wells.

IR Thermometer PRO 10:1

The device has an optical lens that collects the radiated infrared energy from the object and focuses it on the detector. The detector converts the energy into an electrical signal that's amplified and displayed as a temperature reading. An infrared thermometer measures temperature by sensing the magnitude of radiated energy at infrared frequencies. Using this data and the actual temperature of the detector, the thermometer calculates the temperature of the surface that emitted the energy.

Optimize the Flow of People, Equipment and Vehicles

Expert service equipment & systems planning—at no cost to you!

Four Proven Steps:

1 Equipment & Systems Needs Consultation Assessment

Key project document detailing contact information, target launch/phase dates, building requirements and recommended shop equipment to enhance fixed operations.

2 Detailed CAD Drawing

Includes detailed equipment and systems layout in service area as well as a lighting plan with photometric data.

3 Comprehensive Specifications & Budget

Includes detailed specifications for all major equipment called out in the Needs Assessment. Also includes a preliminary equipment and systems budget.

4 Project Coordination & Support

Single point of contact for service equipment and installation.

Let us partner with your architects and contractors to meet all of your facility needs.

Equipment and Systems Planning team members know service areas need to be set up to provide an optimal flow of people, equipment and vehicles into and out of the area. Because of our close partnership with the OEM, we know the Mazda-approved equipment – where to place it for the best usage and work flow throughout the shop and how to get it installed.

Our experts will ensure your facility:

- ▶ Accommodates Future Vehicles
- ▶ Provides Layout Efficiency
- ▶ Maximizes Shop Throughput
- ▶ Meets OEM Design Criteria
