V3300 Diagnostic Wheel Alignment System with VIN Scanner

With a new notification system that provides critical information without slowing you down, the V3300 wheel aligner puts every alignment on the fast track. The groundbreaking user interface provides instant access to critical tasks in an intelligent flow, ensuring vehicle-specific assistance is always just one click away.

- Next Generation UI Optimized for High-Volume User.
- Diagnostic alignment with "Compensate-Warn-Alert" intervention gets it right the first time.
- Unique camera beam design to fit through a standard doorway and protect cameras.
- Highly Accurate and Reliable XD Camera Technology.
- Low profile design, lowers the center of gravity for improved stability when moving.
- Power Requirements: 100-240V AC (must have earth ground) 1Ph 50/60Hz UL201, C22.2, CE Approved.
- VIN Scanner included.
- Shipping Weight: 544 lbs. (246.75 kg)

B2000P Diagnostic Wheel Balancing System

The B2000P is the only automated diagnostic wheel balancing system that offers touchless measurement and analysis. Automatic inputs remove the chance for error and inaccurate results. When combined with precise wheel balancing, the Runout Force Vectoring (RFV) diagnostics assure uniformity based total ride quality.

- **Laser Based Runout** provides advanced measurements quickly and easily, surpassing roller-based system performance.
- **High-Resolution Camera And Laser-Based Topography** renders 3D visuals to reveal problems that otherwise go undetected – making this machine a technician's dream for solving vibration issues.
- **Patented Automatic Power Clamp** ensures accurate and consistent clamping to provide reliable, repeatable measurements.
- **Touchscreen Monitor** provides improved ergonomics with an enhanced user interface.
- **Automatic Inputs and Balance Measurements** eliminate the risk of technician error and optimize the entire balancing process.

V2380 Imaging Wheel Alignment System

Now there's an advanced imaging alignment system that doesn't require lots of training or experience to operate. With the latest XD target and camera system, the V2380 features advanced technology, combined with the simplest, most intuitive software we've ever offered providing the essential tools for any alignment tech. It's the best of both worlds.

Features:

- High resolution cameras produce accurate, live alignment readings and diagnostic data.
- The camera beam automatically follows as the vehicle is raised by tracking the targets.
- Video speed cameras constantly monitor the alignment and provide critical information to get the job done right.
- Our user interface streamlines workflow for enhanced productivity and ensures that alignment repair information is always one click away.
- Touchless AC400 tire clamping system.

Serious Lift Capability for Every Bay and Every Service Job

10,000 lb. Two-Post Asymmetric Lift With AV Arms

Rotary's AV Arms allow you to properly lift any vehicle on recommended OEM pickup points. Get more vehicles in the shop and on the lift faster with easy spotting and superior lifting capabilities.

With the shortest arm retraction and largest pickup range of any two-post lift, Rotary's AV lift arms simplify your shop and give technicians the flexibility and clearance needed to service any vehicle.

- Easily spot lower profile vehicles with the 3 3/8" minimum adapter height.
- All vehicle arms with increased reach.
- Reach small, specific pick-up points on EVs with enough clearance to remove propulsion batteries.
- High-strength tapered arms for easier and faster positioning of adapters compared to traditional arm designs.
- Front Arm Reach 18 1/2" min., 41" max
- Rear Arm Reach 27 5/8" min., 58 1/4 " max.
- Lift comes standard with round adapters, truck adapters and stacking extensions to lift, unibody, frame and EV.

Leak Detection, Digital Trmometer and Air Conditioning Accesories

Tracer Gas Leak Detector Service Kit

The Robinair Tracer Gas service kit gives technicians the tools necessary to use tracer gas in place of refrigerant to find A/C system leaks. The LD9-TGKIT includes a hydrogen gas leak detector with sensor technology designed to detect a 5% hydrogen/95% nitrogen tracer gas mixture. The detector's full color liquid crystal display (LCD) and sweep mode function convey messages, graphics, and prompts to help technicians locate the source of a leak and ensure that the leak detector is always at optimal performance. A patented 3 LED inspection light aids in locating and inspecting suspected leak sources.

Efficiency is Everything

Expert service equipment and systems planning will optimize the flow of people, equipment and vehicles—at no extra cost to you!

Four Proven Steps:

1 Equipment & Systems Needs Consultation Assessment

Key project document detailing contact information, target launch/phase dates, building requirements and recommended shop equipment to enhance fixed operations.

2 Detailed CAD Drawing

Includes detailed equipment and systems layout in service area as well as a lighting plan with photometric data.

3 Comprehensive Specifications & Budget

Includes detailed specifications for all major equipment called out in the Needs Assessment. Also includes a preliminary equipment and systems budget.

4 Project Coordination & Support

Single point of contact for service equipment and installation.

Most architects and contractors don't understand the needs of a service facility—we do!

Equipment and Systems Planning team members know service areas need to be set up to provide an optimal flow of people, equipment and vehicles into and out of the area. Because of our close partnership with the OEM, we know the Mitsubishi-approved equipment – where to place it for the best usage and work flow throughout the shop and how to get it installed.

Our experts will ensure your facility:

- ▶ Accommodates Future Vehicles
- ▶ Provides Layout Efficiency
- ▶ Maximizes Shop Throughput
- ▶ Meets OEM Design Criteria

Call today to speak with an Equipment & Systems Planning Specialist! 1-888-727-6672

Visualize Your Service Department in 3D!

- ▶ Explore your shop design in beautiful real-time 3D prior to construction. Take a walk in the repair shop and see exactly how it will look in real life (via online web conference).
- ▶ Verify equipment color(s) suit your needs prior to purchase.
- ▶ Validate all selected equipment will fit and function properly within the Service Area without interference with the building infrastructure/mechanical systems.
- ▶ Realistic images allow comparison of key product selections, in-ground versus above ground lifts/exhaust systems, tool boxes and workbenches.
