Tire, Wheel and AC Service

Call 1-866-213-4690 to order

V2380 Imaging Wheel Alignment System

Now there's an advanced imaging alignment system that doesn't require lots of training or experience to operate. With the latest XD target and camera system, the V2380 features advanced technology, combined with the simplest, most intuitive software we've ever offered providing the essential tools for any alignment tech. It's the best of both worlds.

Features:

- High resolution cameras produce accurate, live alignment readings and diagnostic data.
- The camera beam automatically follows as the vehicle is raised by tracking the targets.
- Video speed cameras constantly monitor the alignment and provide critical information to get the job done right.
- Our user interface streamlines workflow for enhanced productivity and ensures that alignment repair information is always one click away.
- Touchless AC400 tire clamping system.

Tracer Gas Leak Detector Service Kit

The Robinair Tracer Gas service kit gives technicians the tools necessary to use tracer gas in place of refrigerant to find A/C system leaks. The LD9-TGKIT includes a hydrogen gas leak detector with sensor technology designed to detect a 5% hydrogen/95% nitrogen tracer gas mixture. The detector's full color liquid crystal display (LCD) and sweep mode function convey messages, graphics, and prompts to help technicians locate the source of a leak and ensure that the leak detector is always at optimal performance. A patented 3 LED inspection light aids in locating and inspecting suspected leak sources.

Efficiency is Everything

Expert service equipment & systems planning will optimize the flow of people, equipment and vehicles—at no extra cost to you!

Four Proven Steps:

1 Equipment & Systems Needs Consultation Assessment

Key project document detailing contact information, target launch/phase dates, building requirements and recommended shop equipment to enhance fixed operations.

2 Detailed CAD Drawing

Includes detailed equipment and systems layout in service area as well as a lighting plan with photometric data.

3 Comprehensive Specifications & Budget

Includes detailed specifications for all major equipment called out in the Needs Assessment. Also includes a preliminary equipment and systems budget.

4 Project Coordination & Support

Single point of contact for service equipment and installation.

Most architects and contractors don't understand the needs of a service facility—we do!

Our Equipment and Systems Planning team members know service areas need to be set up to provide an optimal flow of people, equipment and vehicles into and out of the area. Because of our close partnership with the OEM, we know the Subaru-approved equipment – where to place it for the best usage and efficiency throughout the shop and how to get it installed.

Our experts will ensure your facility:

- Accommodates Future Vehicles
- Provides Layout Efficiency
- Maximizes Shop Throughput
- Meets OEM Design Criteria

- Verify equipment color(s) suit your needs prior to purchase.
- Validate all selected equipment will fit and function properly within the Service Department without interference with the building infrastructure/mechanical systems.
- Realistic images allow comparison of key product selections, in-ground versus above ground lifts/exhaust systems, tool boxes and workbenches.

QUALITY DRIVEN SERVICE
