Serious Lift Capability for Every Bay and Every Service Job

10,000 lb. Two-Post Asymmetric Surface-Mounted Lift with Trio Arms and Round Rubber Adapters

- 10,000 lb. lifting capacity.
- Round rubber adapters with vertical adjustment, ideal for lifting vehicles of unibody construction.
- Asymmetric lift design, featuring factory-rotated columns to maximize door-opening clearance for passenger cars.
- TRIO arm design, has maximum reach and retraction to handle a broader range of vehicles.
- Rotary designed and built power units instead of using third party power units for universal applications.
- High-pressure, full-stroke cylinders in both columns.
- Multi-position column locks engage every 4 inches.
- Original "Double S" single-piece column design maximizes column strength.
- Slider bearings of Tivar 1000 polyethylene are self-lubricating and maintenance free.
- Arm restraints make positioning of arms easy. They engage when lift is raised and automatically disengage when lift is fully lowered.
- Overhead cables allow for a clear-floor design and ensure proper equalization of carriage.
- Overhead padded switch prevents damage to vehicle by raising it too high.

39-SPOA10-RA-TRIO

Tire and Wheel Service

V2380 Imaging Wheel Alignment System

Now there's an advanced imaging alignment system that doesn't require lots of training or experience to operate. With the latest XD target and camera system, the V2380 features advanced technology, combined with the simplest, most intuitive software we've ever offered providing the essential tools for any alignment tech. It's the best of both worlds.

Features:

- High resolution cameras produce accurate, live alignment readings and diagnostic data.
- The camera beam automatically follows as the vehicle is raised by tracking the targets.
- Video speed cameras constantly monitor the alignment and provide critical information to get the job done right.
- Our user interface streamlines workflow for enhanced productivity and ensures that alignment repair information is always one click away.
- Touchless AC400 tire clamping system.
- Patented Cross-Diagonal and Rolling Radius.
- EZ-Toe eliminates the need for steering wheel holder.
- Guided adjustments of a single tie rod, A-Arm, drag link and cradle.
- Wheels-off mode eases hard to reach adjustments.
- Maximize profitability with integrated, fast audit check.
- Includes VIN Scanner for fast identification of vehicle make and model.

T7800 All-In-One Tire Changer

The John Bean T7800 is a leverless tire changer featuring a unique collection of tools, including intuitive control panel, powerMONT™, lower bead camera viewer, on-floor bead breaker and quickLOK™ technology. It was engineered with superior functionalities that require less effort for technicians to operate and an advanced set of tools that only touch the tire, never the rim, minimizing the risk of damage when working with standard, UHP and run-flat tires.

119-EEWH586AUB

\$21,802.00

Retailer Price \$25,700.00

B2000P Diagnostic Wheel Balancing System

The B2000P is the only automated diagnostic wheel balancing system that offers touchless measurement and analysis. Automatic inputs remove the chance for error and inaccurate results. When combined with precise wheel balancing, the Runout Force Vectoring (RFV) diagnostics assure uniformity based total ride quality.

Leak Detection, Digital Thermometer and Air Conditioning Accessories

Digital Thermometer

This digital thermometer gives you full-feature capabilities in a case that is small enough to fit in your shirt pocket. A wide temperature range and highly accurate readings make it useful for a variety of applications.

- Accurate readings from -40° F to 390° F ($\pm 2^\circ$) and from -40° C to 200° C ($\pm 1^\circ$).
- Switch selects Celsius or Fahrenheit.
- Sampling time is just one second; HOLD button freezes display for accuracy.
- Easy-to-read display can be read even in direct sunlight.
- Durable case includes a cover to protect the probe.
- Uses one 1.5V battery; includes battery-saver mode.
- Min/Max display for reading temperature ranges.

42-43240

Tracer Gas Leak Detector Service Kit

The Robinair Tracer Gas service kit gives technicians the tools necessary to use tracer gas in place of refrigerant to find A/C system leaks. The LD9-TGKIT includes a hydrogen gas leak detector with sensor technology designed to detect a 5% hydrogen/95% nitrogen tracer gas mixture.

The detector's full color liquid crystal display (LCD) and sweep mode function convey messages, graphics, and prompts to help technicians locate the source of a leak and ensure that the leak detector is always at optimal performance. A patented 3 LED inspection light aids in locating and inspecting suspected leak sources.

42-LD9-TGKIT

\$825.00

Retailer Price \$881.00

Transmission Service

1/2-Ton Telescopic Under Hoist Air/Hydraulic Transmission Jack

Designed for the removal, installation and transportation (in the lowered position) of transmissions and transfer cases on passenger cars, vans and light trucks that are raised by an in-ground or above-ground lift.

Features:

- Air/hydraulic foot pump provides hands-free operation and easy, convenient lifting.
- Metered pump valve provides safe lowering of load.
- Fully adjustable universal saddle with hand adjustable corner brackets and safety chain.
- Safety overload system prevents jack from being used beyond the ASME/ PASE load-limiting standard.
- Two-stage flash chromed rams inhibit rust from entering hydraulic system.
- Wide base with four easy rolling 4" diameter swivel ball bearing caster wheels (one is a locking caster wheel) provides stability and easy maneuvering in its lowered position.
- Polyurethane wheels provide protection for expensive tile and epoxy floors.

Efficiency is Everything

Expert service equipment & systems planning will optimize the flow of people, equipment and vehicles—at no extra cost to you!

Four Proven Steps:

1 Equipment & Systems Needs Consultation Assessment

Key project document detailing contact information, target launch/phase dates, building requirements and recommended shop equipment to enhance fixed operations.

2 Detailed CAD Drawing

Includes detailed equipment and systems layout in service area as well as a lighting plan with photometric data.

3 Comprehensive Specifications & Budget

Includes detailed specifications for all major equipment called out in the Needs Assessment. Also includes a preliminary equipment and systems budget.

4 Project Coordination & Support

Single point of contact for service equipment and installation.

Most architects and contractors don't understand the needs of a service facility—we do!

Our Equipment and Systems Planning team members know service areas need to be set up to provide an optimal flow of people, equipment and vehicles into and out of the area. Because of our close partnership with the OEM, we know the Subaru-approved equipment – where to place it for the best usage and efficiency throughout the shop and how to get it installed.

Our experts will ensure your facility:

- Accommodates Future Vehicles
- Provides Layout Efficiency
- Maximizes Shop Throughput
- Meets OEM Design Criteria

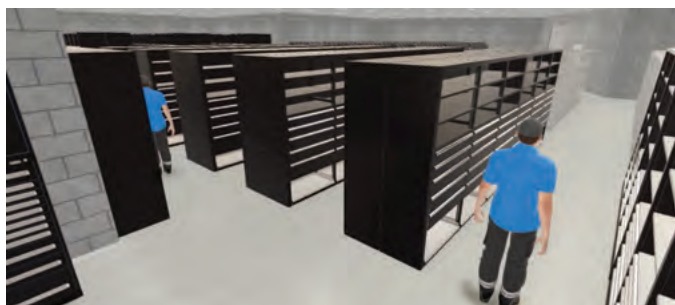

QUALITY DRIVEN SERVICE
