Tire and Wheel Service

V2380 Imaging Wheel Alignment System

Now there's an advanced imaging alignment system that doesn't require lots of training or experience to operate. With the latest XD target and camera system, the V2380 features advanced technology, combined with the simplest, most intuitive software we've ever offered providing the essential tools for any alignment tech. It's the best of both worlds.

Features:

- High resolution cameras produce accurate, live alignment readings and diagnostic data.
- The camera beam automatically follows as the vehicle is raised by tracking the targets.
- Video speed cameras constantly monitor the alignment and provide critical information to get the job done right.
- Our user interface streamlines workflow for enhanced productivity and ensures that alignment repair information is always one click away.
- Touchless AC400 tire clamping system.

V3300 Diagnostic Wheel Alignment System with VIN Scanner

With a new notification system that provides critical information without slowing you down, the V3300 wheel aligner puts every alignment on the fast track. The groundbreaking user interface provides instant access to critical tasks in an intelligent flow, ensuring vehicle-specific assistance is always just one click away.

Features:

- Next Generation UI Optimized for High-Volume User.
- Diagnostic alignment with "Compensate-Warn-Alert" intervention gets it right the first time.
- Unique camera beam design to fit through a standard doorway and protect cameras.
- Highly Accurate and Reliable XD Camera Technology.
- Low profile design, lowers the center of gravity for improved stability when moving.
- VIN Scanner included.
- Power Requirements: 100-240V AC (must have earth ground) 1Ph 50/60Hz UL201, C22.2, CE Approved.
- Shipping Weight: 544 lbs. (246.75 kg)

Leak Detection, Digital Thermometer and Air Conditioning Accessories

Tracer Gas Leak Detector Service Kit

The Robinair Tracer Gas service kit gives technicians the tools necessary to use tracer gas in place of refrigerant to find A/C system leaks. The LD9-TGKIT includes a hydrogen gas leak detector with sensor technology designed to detect a 5% hydrogen/95% nitrogen tracer gas mixture. The detector's full color liquid crystal display (LCD) and sweep mode function convey messages, graphics, and prompts to help technicians locate the source of a leak and ensure that the leak detector is always at optimal performance. A patented 3 LED inspection light aids in locating and inspecting suspected leak sources.

42-LD9-TGKIT
\$775.00
 Retailer Price \$881.00

Digital Thermometer

This digital thermometer gives you full-feature capabilities in a case that is small enough to fit in your shirt pocket. A wide temperature range and highly accurate readings make it useful for a variety of applications.

- Accurate readings from -40° F to 390° F (±2°) and from -40° C to 200° C (±1°).
- Switch selects Celsius or Fahrenheit.
- Sampling time is just one second; HOLD button freezes display for accuracy.
- Easy-to-read display can be read even in direct sunlight.
- Durable case includes a cover to protect the probe.
- Uses one 1.5V battery; includes battery-saver mode.
- Min/Max display for reading temperature ranges.

42-43240
\$28.00
 Retailer Price \$35.00

Premium Refrigerant Leak Detector

Efficiency is Everything

Expert service equipment & systems planning will optimize the flow of people, equipment and vehicles—at no extra cost to you!

Four Proven Steps:

1 Equipment & Systems Needs Consultation Assessment

Key project document detailing contact information, target launch/phase dates, building requirements and recommended shop equipment to enhance fixed operations.

2 Detailed CAD Drawing

Includes detailed equipment and systems layout in service area as well as a lighting plan with photometric data.

3 Comprehensive Specifications & Budget

Includes detailed specifications for all major equipment called out in the Needs Assessment. Also includes a preliminary equipment and systems budget.

4 Project Coordination & Support

Single point of contact for service equipment and installation.

Most architects and contractors don't understand the needs of a service facility—we do!

Our Equipment and Systems Planning team members know service areas need to be set up to provide an optimal flow of people, equipment and vehicles into and out of the area. Because of our close partnership with the OEM, we know the Subaru-approved equipment – where to place it for the best usage and efficiency throughout the shop and how to get it installed.

Our experts will ensure your facility:

- Accommodates Future Vehicles
- Provides Layout Efficiency
- Maximizes Shop Throughput
- Meets OEM Design Criteria

QUALITY DRIVEN SERVICE
