Serious Lift Capability and AC Service

VOLVO
RETAILER EQUIPMENT

10,000 lb. Two-Post Asymmetric Lift With AV Arms

Rotary's AV Arms allow you to properly lift any vehicle on recommended OEM pickup points. Get more vehicles in the shop and on the lift faster with easy spotting and superior lifting capabilities.

- Easily spot lower profile vehicles with the 3 3/8" minimum adapter height.
- All vehicle arms with increased reach.
- Reach small, specific pick-up points on EVs with enough clearance to remove propulsion batteries.
- High-strength tapered arms for easier and faster positioning of adapters compared to traditional arm designs.
- Front Arm Reach 18 1/2" min., 41" max
- Rear Arm Reach 27 5/8" min., 58 1/4" max.
- Lift comes standard with round adapters, truck adapters and stacking extensions to lift, unibody, frame and EV.

V2380 Imaging Wheel Alignment System

Now there's an advanced imaging alignment system that doesn't require lots of training or experience to operate. With the latest XD target and camera system, the V2380 features advanced technology, combined with the simplest, most intuitive software we've ever offered providing the essential tools for any alignment tech. It's the best of both worlds.

Features:

- High resolution cameras produce accurate, live alignment readings and diagnostic data.
- The camera beam automatically follows as the vehicle is raised by tracking the targets.
- Video speed cameras constantly monitor the alignment and provide critical information to get the job done right.
- Our user interface streamlines workflow for enhanced productivity and ensures that alignment repair information is always one click away.
- Touchless AC400 tire clamping system.

Air Conditioning Service and Accessories

CoolTech Coolant Exchanger

- Our 10 minute exchange process means no more waiting for the engine to warm up!
- Our "Engine off" feature removes pulleys, belts, and fan blades from the safety equation.
- Vacuum mode creates a "push/pull" exchange process allowing the technician to safely remove high pressure in a hot system.
- Leak check feature allows the technician to test for leaks prior to refilling.
- Two clearly marked valves and an easy-to-read gauge make this machine very easy to use.

IR Thermometer PRO 10:1

The device has an optical lens that collects the radiated infrared energy from the object and focuses it on the detector. The detector converts the energy into an electrical signal that's amplified and displayed as a temperature reading. An infrared thermometer measures temperature by sensing the magnitude of radiated energy at infrared frequencies. Using this data and the actual temperature of the detector, the thermometer calculates the temperature of the surface that emitted the energy.

Efficiency is Everything

Expert service equipment & systems planning will optimize the flow of people, equipment and vehicles—at no extra cost to you!

Four Proven Steps:

1 Equipment & Systems Needs Consultation Assessment

Key project document detailing contact information, target launch/phase dates, building requirements and recommended shop equipment to enhance fixed operations.

2 Detailed CAD Drawing

Includes detailed equipment and systems layout in service area as well as a lighting plan with photometric data.

3 Comprehensive Specifications & Budget

Includes detailed specifications for all major equipment called out in the Needs Assessment. Also includes a preliminary equipment and systems budget.

4 Project Coordination & Support

Single point of contact for service equipment and installation.

Most architects and contractors don't understand the needs of a service facility—we do!

Equipment and Systems Planning team members know service areas need to be set up to provide an optimal flow of people, equipment and vehicles into and out of the area. Because of our close partnership with the OEM, we know the Volvo-approved equipment – where to place it for the best usage and work flow throughout the shop and how to get it installed.

Our experts will ensure your facility:

- ▶ Accommodates Future Vehicles
- ▶ Provides Layout Efficiency
- ▶ Maximizes Shop Throughput
- ▶ Meets OEM Design Criteria

Call today to speak with an Equipment & Systems Planning Specialist! 1.800.345.3399

Visualize Your Service Department in 3D!

- ▶ Explore your shop design in beautiful real-time 3D prior to construction. Take a walk in the repair shop and see exactly how it will look in real life (via online web conference).

- ▶ Verify equipment color(s) suit your needs prior to purchase.

- ▶ Validate all selected equipment will fit and function properly within the Service Area without interference with the building infrastructure/mechanical systems.

- ▶ Realistic images allow comparison of key product selections, in-ground versus above ground lifts/exhaust systems, tool boxes and workbenches.
