Serious Lift Capability, AC Service and Tire Service

VOLVO
RETAILER EQUIPMENT

10,000 lb. Two-Post Asymmetric Lift With AV Arms

Rotary's AV Arms allow you to properly lift any vehicle on recommended OEM pickup points. Get more vehicles in the shop and on the lift faster with easy spotting and superior lifting capabilities.

- Easily spot lower profile vehicles with the 3 3/8" minimum adapter height.
- All vehicle arms with increased reach.
- Reach small, specific pick-up points on EVs with enough clearance to remove propulsion batteries.
- High-strength tapered arms for easier and faster positioning of adapters compared to traditional arm designs.
- Front Arm Reach 18 1/2" min., 41" max
- Rear Arm Reach 27 5/8" min., 58 1/4" max.
- Lift comes standard with round adapters, truck adapters and stacking extensions to lift, unibody, frame and EV.

Two-Post Lifts

Clear Floor Two-Post 12,000 lbs. Lift

- Massive 12,000-lbs. lifting capacity for cars, trucks, SUVs, vans, and EVs.
- Triple-telescoping Bi-Metric swing arms provide both symmetric and asymmetric lifting configurations from a single lift.
- Automatic Swing Arm Restraint System (ASARS) locks arms securely in place using forged steel teeth for improved stability and safety.
- High-rise lifting design delivers up to 82.5 inches of lifting height for comfortable undercar access.
- Clearfloor configuration eliminates floor obstructions and allows easy movement of transmission jacks and tool carts beneath vehicles.
- Low-profile arm design reaches OEM lifting points on low-sitting sports cars and modern EVs.
- Wide or narrow installation options allow the lift to fit different shop layouts and bay sizes.
- Ergonomic single-point safety lock release simplifies lowering procedures and improves operator convenience.
- Includes a 12-piece adapter set for handling a wide variety of chassis and frame configurations.

12AP-SRT Heavy-Duty 12,000-lbs. Lift

- Heavy-duty 12,000-lbs. lifting capacity handles full-size trucks, SUVs, vans, and commercial vehicles.
- Short-rise column design allows installation in shops with lower ceiling heights while still delivering professional lifting capability.
- Adaptable clearfloor layout eliminates floor obstructions for improved workflow and tool movement.
- Symmetric and asymmetric lifting configurations provide flexibility for servicing different vehicle sizes and wheelbases.
- Triple-stage front arms offer extended reach for difficult lifting points and modern vehicle chassis.

OctaFlex EV12DPS 12,000 lbs.

- World's first two-post lift with eight fully adjustable telescoping lift arms for unmatched versatility.
- Patent-pending OctaFlex design combines traditional lifting arms with integrated powered lift-assist arms in one system.
- Auxiliary lift-assist arms can safely lift and maneuver EV battery packs, drivetrains, truck cabs, and heavy components.
- Lift-assist arms support up to 2,500 lbs. for ergonomic component handling and reduced technician strain.
- Triple-telescoping primary arms extend farther than traditional lift arms for expanded lifting-point coverage.

Tire and Wheel Service

V2380 Imaging Wheel Alignment System

Now there's an advanced imaging alignment system that doesn't require lots of training or experience to operate. With the latest XD target and camera system, the V2380 features advanced technology, combined with the simplest, most intuitive software we've ever offered providing the essential tools for any alignment tech. It's the best of both worlds.

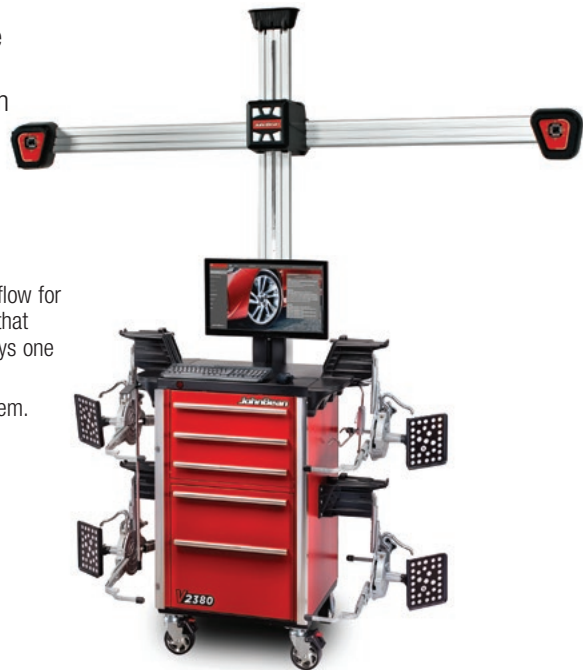

Features:

- High resolution cameras produce accurate, live alignment readings and diagnostic data.
- The camera beam automatically follows as the vehicle is raised by tracking the targets.
- Video speed cameras constantly monitor the alignment and provide critical information to get the job done right.
- Our user interface streamlines workflow for enhanced productivity and ensures that alignment repair information is always one click away.
- Touchless AC400 tire clamping system.

Service Jacks

3-Ton Capacity Service Jack

Flanged upper body edge increases strength to resist twisting. A light, compact design makes this jack easy and convenient to use when positioning under a vehicle and lifting. A built-in safety overload system prevents use beyond the rated capacity for safer operation. Dual Pump Design lifts 800kg (1750 lb.) load to 19 inches in just 3 pumps. Cycle tested design for a long life of professional duty.

- Reach: 63.9"
- Saddle: 4" dia., steel crown
- Lifting range: 5-3/4" to 18-1/2"
- Frame height: 6.3"
- Handle length: 39-1/2" padded lower handle
- Floor space: 13.4" x 24.5"
- Casters: 4; 3.5" front fixed (2), 2.36" rear swivel (2)
- Limited Lifetime Warranty

IR Thermometer PRO 10:1

The device has an optical lens that collects the radiated infrared energy from the object and focuses it on the detector. The detector converts the energy into an electrical signal that's amplified and displayed as a temperature reading. An infrared thermometer measures temperature by sensing the magnitude of radiated energy at infrared frequencies. Using this data and the actual temperature of the detector, the thermometer calculates the temperature of the surface that emitted the energy.

Wheel Service and Storage Solutions

Air-Operated Tire and Wheel Lift

Tire and wheel assemblies are heavy. This can make mounting and demounting difficult and dangerous for one person. Heavy lifting accounts for 20% of all workplace injuries. The QSP air-powered mobile tire lift assists technicians by making everyday tasks much easier. The 200 lb. capacity LM-200 is a powerful tool that can reduce injuries and will be a workhorse in your shop. Designed with an off-center column for better access to lug nuts, balancers and changers. The LM-200 is made in the U.S.A.

716-LM-200

Efficiency is Everything

Expert service equipment & systems planning will optimize the flow of people, equipment and vehicles—at no extra cost to you!

Four Proven Steps:

1 Equipment & Systems Needs Consultation Assessment

Key project document detailing contact information, target launch/phase dates, building requirements and recommended shop equipment to enhance fixed operations.

2 Detailed CAD Drawing

Includes detailed equipment and systems layout in service area as well as a lighting plan with photometric data.

3 Comprehensive Specifications & Budget

Includes detailed specifications for all major equipment called out in the Needs Assessment. Also includes a preliminary equipment and systems budget.

4 Project Coordination & Support

Single point of contact for service equipment and installation.

Most architects and contractors don't understand the needs of a service facility—we do!

Equipment and Systems Planning team members know service areas need to be set up to provide an optimal flow of people, equipment and vehicles into and out of the area. Because of our close partnership with the OEM, we know the Volvo-approved equipment – where to place it for the best usage and work flow throughout the shop and how to get it installed.

Our experts will ensure your facility:

- ▶ Accommodates Future Vehicles
- ▶ Provides Layout Efficiency
- ▶ Maximizes Shop Throughput
- ▶ Meets OEM Design Criteria

Visualize Your Service Department in 3D!

- ▶ Explore your shop design in beautiful real-time 3D prior to construction. Take a walk in the repair shop and see exactly how it will look in real life (via online web conference).
- ▶ Verify equipment color(s) suit your needs prior to purchase.
- ▶ Validate all selected equipment will fit and function properly within the Service Area without interference with the building infrastructure/mechanical systems.
- ▶ Realistic images allow comparison of key product selections, in-ground versus above ground lifts/exhaust systems, tool boxes and workbenches.
